Postdoc Position
Human-centred S&P in systems with AI

Universitat Politècnica de València
AQUÍ. HOY. MAÑANA.

UNIVERSITAT POLITÈCNICA DE VALÈNCIA
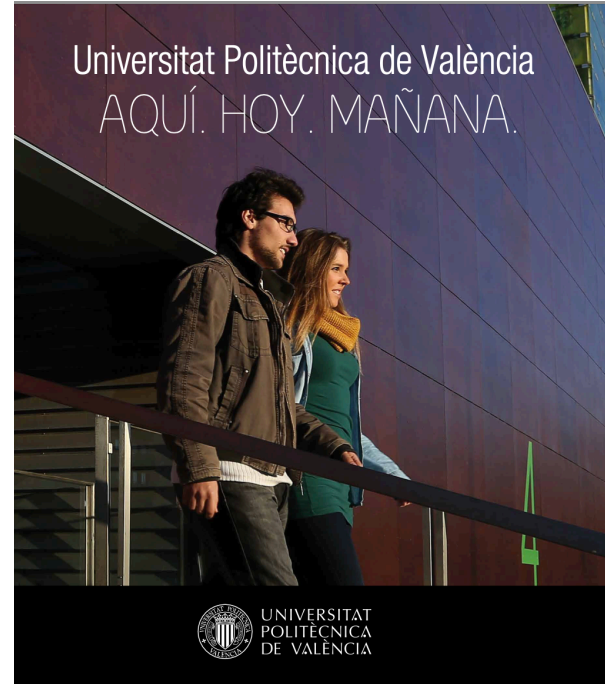

PostDoc Research Associate

Come and join us for a two-year postdoc position (with possibility of extension) on **human aspects and usable security and privacy for systems with AI**. You'll be joining the new branch of the HASP lab headed by Prof Jose Such at Universitat Politecnica de Valencia in the EU.

The working language of the lab is English. Also, Valencia is in Spain (EU), so you will have plenty of opportunities to learn Spanish if you wish, which is the second most-spoken language in the world.

Valencia is one of the most liveable cities in Europe and the world. It is flat and so easy and with very good infrastructure to cycle around. Valencia offers lots of green spaces, having won the European Green Capital recognition for 2024 from the EU commission. What's more, it is way cheaper than other big European cities, and it enjoys an amazing weather all year round, ensuring that, after that draining deadline for a paper, you can go and relax in the beach (which is just 15 minutes from the university).

‣ 2-year contract (with possibility of extension)
‣ Human-centred/usable S&P in AI systems
‣ Qualitative or Quantitative Research
‣ 2,500€ / month (and free healthcare)

Start: 01 January 2024 (or as soon as possible thereafter)
